

AEONPUMP Raptor 4D

GENERAL INFORMATION

ID	24P00111
Make	AEONPUMP
Year	2024
Construction	Wastewater pumps
Fuel	Diesel
Weight	880 kg
Power kw	6
Power hp	8
Length	164 cm
Width	99 cm
Height	148 cm

TECHNICAL INFORMATION

- available with any desired quick coupling.
- Can be used immediately
- Float switch (start/stop system)
- Ground switch
- in stock!
- MULTIPLE UNITS IN STOCK!
- NEW and UNUSED!
- PUMPED UP AND READY TO FLOW!
- Screw (channel) pump impeller
- Spare parts available, usually in stock
- Stack frame
- SUPER silent housing (SUPER quiet)
- Supported by van vacuum pump

DESCRIPTION

The AEON Pump is a powerful and reliable solution for efficiently moving water in various industrial and heavy-duty applications. Equipped with a Hidrostral water pump and a robust Hatz diesel engine, this pump is able to move large volumes of water quickly and effectively, even under the toughest conditions.

The Hidrostral water pump is known worldwide for its exceptional performance and durability. Together with the Hatz diesel engine, which is known for its efficiency and reliability, this pump offers the perfect combination of power, energy efficiency and long service life. Whether it is pumping out large water reservoirs, dewatering construction pits, or disposing of contaminated water in industrial environments, the AEON Pump offers the performance you need.

Key features:

Hidrostral Water Pump: This high-quality pump is designed for heavy-duty applications and offers excellent performance, even in contaminated water with coarse particles.

Hatz Diesel Engine: The pump is powered by a Hatz diesel engine, which is known for its reliability and long service life. The engine is energy efficient and ideal for long-term use in

intensive conditions.

Maximum capacity: The AEON pump can move large volumes of water, making it suitable for the most demanding dewatering projects.

High efficiency: The combination of the Hidrostal water pump and the Hatz engine ensures optimum operation with minimal fuel costs.

Durable and reliable: The robust design of the pump guarantees a long service life, even in harsh environments, while the Hatz engine ensures a reliable and constant energy source.

Technical specifications:

Pump: Hidrostal water pump

Engine: Hatz diesel engine 1D81Z

Engine power: 5.5 kW - 1500 RPM)

Maximum capacity: Up to 135 m³/h

Maximum delivery head: Up to 21 MWK

Fuel: Diesel

Connections: Various connection options depending on the model

Housing material: Robust, corrosion-resistant material

Weight: 880 kg

The AEON Pump, equipped with the reliable Hidrostal water pump and Hatz diesel engine, offers unmatched performance for any heavy-duty dewatering or pumping application.

Whether you work in construction, mining, agriculture or other industrial sectors, this pump ensures efficient and sustainable water drainage.

Order the AEON Pump now and benefit from the power and reliability of the Hidrostal water pump and Hatz diesel engine for your next project!

Throughput capacity: 165 m³/h

Max dirt passage: 75 mm

Motor brand: Hatz

Max. head: 21 MWK

Max dirt passag: 1500 rpm

Weight: 880 kg
