| ID | 24P00174 |
| Make | BBA |
| Type | With Volvo diesel |
| Year | 2009 |
| Operating hours | 410 |
| Construction | Water pumps |
| Fuel | Diesel |
| Weight | 3.250 kg |
| Power kw | 85 |
| Power hp | 116 |
| Length | 365 cm |
| Width | 150 cm |
| Height | 240 cm |

TECHNICAL INFORMATION

DESCRIPTION

B300 Diesel-driven Self-priming Centrifugal Pump with bronze impeller

For when you want to move 1250 m³ of water per hour and do it in style.

Does your water management need the power of a turbo? Meet the B300, a real muscle man among pumps! This guy is not only powerful, but also so smart that he primes himself. Saves you work!

Why choose the B300?

- Capacity that impresses: With a maximum capacity of 1250 m³ per hour, you are prepared for everything from a small flood to a wet Apocalypse.
- No wimp: A maximum delivery head of 15 meters of water column. Perfect for when nature has been a little too enthusiastic.
- Flexible giant: With its adjustable discharge pipe, you can direct water exactly where you want it. Left, right, up or down – your choice!

What makes it special? • Built like a tank: Galvanized frame with soundproofed housing so it can handle even the toughest conditions.

• Long life: Thanks to the open impeller and a replaceable wear plate, wear is minimal. That means less maintenance and more time for coffee.

Multifunctional wonder

Whether you:

- Fight flooding,
- Irrigate your land,
- Or just want to impress the neighbors...

The B300 does it all.

- Wet self-priming (handy, because dry pumps don't pump anything).
- Suitable for hot liquids

Why wait?

Are you ready to move water like a pro? Then choose this B300 and show nature who's boss.
