

GODWIN WATERPUMPS (Xylem) 103M PERKINS 404D-22T

GENERAL INFORMATION

ID	24P00121
Make	GODWIN WATERPUMPS (Xylem)
Year	2017
Operating hours	7.100
Construction	Wastewater pumps
Fuel	Diesel
Weight	1.500 kg
Power kw	22
Power hp	30
Length	180 cm
Width	105 cm
Height	150 cm

TECHNICAL INFORMATION

- 4" (4 inch) connection parts BAUER / Type B
- available with any desired quick coupling.
- Can be used immediately
- in stock!
- PUMPED UP AND READY TO FLOW!
- Pumping water-thin to highly viscous liquids and/or solid components
- self-priming (dry)
- Self-priming (dry, vacuum assisted)
- Spare parts available, usually in stock
- Suitable for pumping surface water / construction site water
- Supported by van vacuum pump
- Unlimited dry running
- We provide appropriate documentation for the purpose of Export

DESCRIPTION

The Godwin Dri-Prime CD150M pump is an extremely powerful yet compact pump with flow rates up to 230 m³/h and heads up to 51 meters.

The CD103M is equipped with the unique Godwin high pressure oil bath mechanical seal. This allows the pump run dry for extended periods while automatically refill. The CD103M is capable of operating under the harshest conditions.

CD103M handles solids up to 75 mm in diameter. This makes it a highly effective pump, suitable for both slurry and clean water applications. The powerful CD103M has proven itself to be the pump of choice for contractors, local governments, industrial and environmental companies.
